

Gyanankur Good News: June 2018

Rohan's story*

Rohan is sharp and intelligent in the areas he likes, was trying hard to get some good marks in his every test, but couldn't do so. He lives with his mother and brother in Maher.

We sent him for testing and the reports showed that he had Dyslexia, Dysgraphia and Dyscalculia. So we changed his subjects to match his abilities and then he showed interest in learning the new subjects, which gave him hope that he'd get good marks in the exams. His confidence level increased and he looked more happy than before. Some more studying tips were given to Rohan and lot of prayers were said for him. Support from teachers really made a big difference in him. Whenever he needed help, teachers were there to help him and teach him.

Now Rohan has achieved distinction level in his exams!

**Name changed for privacy*

Our year (Std) 10 students completed their exams and **every student passed**, with an average mark of 71.66%! We are delighted that so many **girls** have completed Class 10

this school year, and two topped the year with 93%. When we started this school 13 years ago, two thirds of the students were boys. We are so proud of these rural girls who are living a new way of empowerment and integrity.

=====

Now the 2018-19 School Year is starting. We welcome new teachers, have held professional development for all staff for 2 weeks and now are welcoming the students - from Nursery (2.5 & 3 yr olds) to Std. 10.

We still support 52 students from 2 slums who attend a city school. Here is our social worker Surekha with some of their mothers, who she is teaching to read and write.
